## Semester Ganjil Tahun Pembelajaran 2023 \_ 2024

**Task 1: Read the text and analyze it, follow the example above!**

### STONEHENGE

People visit Salisbury Plain in Southern England to see Stonehenge, one of the great mysteries of the world. Thirty tall stones stand in a circle. Some are 50.000 kilos. Nature didn't put the stones there. People started to build this ancient circle 4.500 years ago. There are different groups of people worked 1800 years to build this ancient circle.

Some people think the stones came from a place almost 400 kilometers away. No one is sure how those heavy stones came to Salisbury Plain. No one knows the purpose of Stonehenge either. Some say it is a religious place. Other says it is a type of calendar. As the sun passes, the stones make shadows. The shadows are long in summer and short in winter. On the longest day of the year, the stones make one long shadow. Perhaps the builder used Stonehenge to follow the seasons. Will we ever have answer to ancient's mysteries of Stonehenge?

1. What is the social function of the text above? The social function is

.....  
.....

2. Explain the generic structure of the text!

a. Identification :

.....

b. Description :

- .....

.....

- .....

.....

- .....

.....

- .....

.....

- .....

.....

- .....

.....

3. What are the language features of the text!

a. Adjective : .....

.....

.....

.....

.....

b. Noun

- Countable :

- Uncountable :

- Noun phrase :

c. Simple present :

- Verbal sentences

.....

.....

.....

- Nominal sentences

.....

.....

.....
